ANALYTICS
SERVICES…

Will help your business to get value from your data with the following tools: Artificial Intelligence, Machine Learning, and Big Data.

KIO Networks®

PROPHECY
PREDICTIONS WITHOUT PROBLEMS
by **KIO**Networks®

Prophecy is an Artificial Intelligence tool that detects anomalies in servers, databases, applications, hardware or any system that generates LOGS in order to take the required measures before they cause relevant incidents or falls.
Prophecy automates the operation, it also reduces incidents and provides proactive services to organizations.
